About Us.

Who We Are

Chaseman Global is at the forefront of talent attraction within the Life Sciences verticals. With over a decade of experience, we have built a consultative model that has transformed businesses looking to positively impact the future of our planet. We have grown to become the industry leader in scaling talent sustainability through the long-term partnerships we have harvested and the bright minds we have cultivated.

Our Mission

At Chaseman Global, we are sowing the seeds for a sustainable future. We partner with industry-leading clients and best-in-class talent who share our mission of developing global sustainable solutions through innovation. With our global reach we are here to add deep-rooted value to our clients, people and planet.

Insights.

Case Studies

We pride ourselves on our ability to transform businesses across the global field of Life Sciences, connecting bright minds to create smart, sustainable solutions for the planet. Visit our website to explore the great work and long-term partnerships we have established with our clients by reading our case studies.

Spotlights

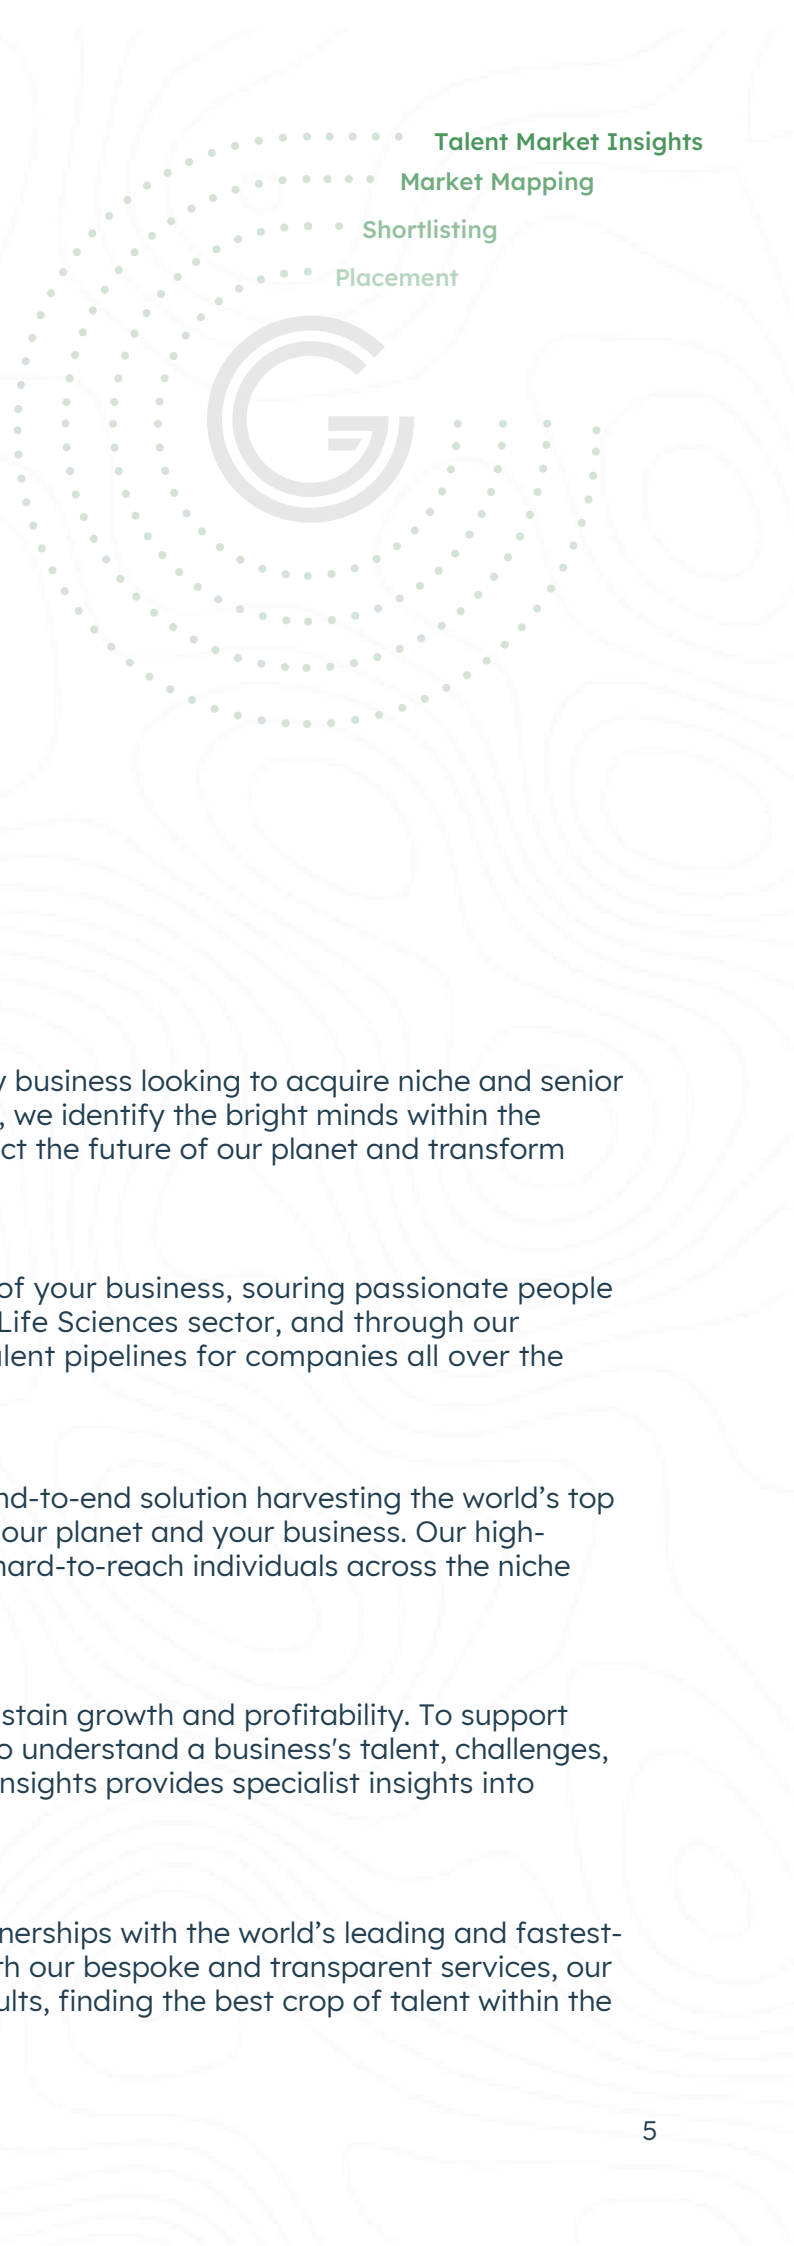

As part of an ongoing series, Chaseman Global shines a Spotlight on the innovative businesses within the Life Sciences vertical that are making a positive impact on our planet's environment and future sustainability. Discover the innovators scaling global sustainability, from companies combating climate change to organisations fighting the 2050 food crisis.

Podcasts

Hosted by Clare Nasir, Cultivating Conversations is the home of thought-provoking conversations about our Planet's future. Our latest series focuses on the ever-evolving subject of Food Tech, Ag Tech & Clean Tech. Here Clare speaks to some of the world's key innovators within the space, who lend their expertise to provide great insight for our loyal listeners. Our podcast is available on all major podcast platforms, including Spotify and Apple Music.

Non-Execs

Chaseman Global's Non-Exec programme helps connect fast-growing Life Sciences companies with advisers, with no strings attached. Our initiative enables companies to find the right advisor to scale their businesses and gives the ability to share their experience and support world-changing start-ups. Join our Non-Exec programme today and discover how Chaseman is giving back to the sector.

What we do.

Market Mapping

Market Mapping is an essential service for any business looking to acquire niche and senior talent within their sector. At Chaseman Global, we identify the bright minds within the LifeSciences verticals who can positively impact the future of our planet and transform your company.

Shortlisting

Shortlisting can sow the seeds for the future of your business, sourcing passionate people who can scale growth. We are experts in the Life Sciences sector, and through our Shortlisting service, we have built effective talent pipelines for companies all over the world.

Search & Placement

Our Search and Placement service is a total end-to-end solution harvesting the world's top talent who can shape a sustainable future for our planet and your business. Our high-quality process can help you source typically hard-to-reach individuals across the niche talent pool within Life Sciences.

Talent Market Insights

Pioneering companies continually evolve to sustain growth and profitability. To support organisations we work with decision-makers to understand a business's talent, challenges, trends, and opportunities. Our Talent Market Insights provides specialist insights into future talent acquisition strategies.

How We Work

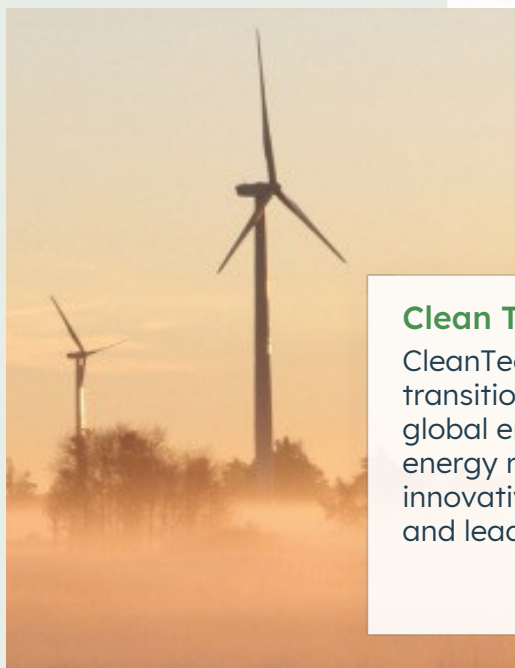

We pride ourselves on building long-term partnerships with the world's leading and fastest-growing Life Sciences organisations. Along with our bespoke and transparent services, our interactive client portal tool yields organic results, finding the best crop of talent within the market who can transform your business.

Sectors.

Animal Agriculture

We know investment in Animal Agriculture continues to grow as more sustainable, traceable and ethical practices are introduced to the animal farming food chain. At Chaseman Global, our areas of expertise within this sector help source the world's fastest-growing Life Sciences companies source top talent within Animal Agriculture.

Clean Technology

CleanTech companies are central to the clean energy transition. Chaseman Global are at the forefront of this global environmental sustainable and renewable energy revolution, powering some of the sector's most innovative organisations with our specialist innovators and leaders.

Crop Inputs

With support from advanced technology innovators, crop retailers and producers continue to improve the efficiency of Crop Inputs. Work within this sector enhances the growth, quality, and high yield of crops to help fight the 2050 food crisis. At Chaseman Global, we strive to source talent who can contribute to sustainable crop solutions.

Digital Agriculture

Developing technologies within this Agricultural space is helping to make farming and food production more seamless and sustainable. As the power of digital and smart farming becomes more prevalent, we identify the passionate people driving the future of our planet and businesses within Digital Agriculture.

Food Technology

Emerging innovators are developing newly sustainable, traceable and scalable food solutions to help strengthen and grow the sector. Increased investment into these technologies will support the way we feed our planet. As specialists in Food Technology, we have the expertise to source bright minds who can drive change within this niche sector.
